TRENTON RINGGER'S USER MANUAL

WOAH SO COOL!

MY STYLE

- Clean, technical, and formatted.

- I like to play video-games, cook, bake, and many other things.

- I like to give my input, and what I think about things.

- I love to talk, and get into interesting conversations.

- Movies, game mechanics, food, are just some topics I like to talk about.

- Technical topics are a favorite of mine, be it on the hardware or software side of things.

HOW BEST TO COMMUNICATE WITH ME

- I like people to approach me whenever, and wherever.

- I always make time to have friendly conversations.

- I would like people to communicate with me directly in person, or through a voice call.

- I also use emails, and messenger systems.

- Anything works but I like in person the best.

WHAT I VALUE

- I value quality, good conversation.

- I love conversations that go in depth, have a fun topic, and have some importance.

- I like having the interactions I have in my life bring worth and growth to myself as a person.

- I love helping others with technical questions.

- Having a fun time talking with back, and forth banter.

HOW I MAKE DECISIONS

- I make decisions by making a plan of action.

- I decide what my choices are, and narrow them down to the best possible one for what needs to be done.

- I will always take input from others when possible.

HOW TO HELP ME

- People can help me by taking charge of tasks they are assigned.

- People should ask for help when they aren't on track to completion.

- We can work together as a team without getting overwhelmed when we rely on each other.

WHAT I DON'T HAVE PATIENCE FOR

- Someone who doesn't want to include someone in a group because of something petty / if they don't like them.

- Someone who acts like they know what they're doing, when they don't.

- I prefer for someone to be honest so that they can get the help they need to learn how to do it.

WHAT PEOPLE MISUNDERSTAND ABOUT ME

- I am sometimes misunderstood in the way I say things.

- People can get offended when it wasn't intended to offend.

- Sometimes I am too technical, or quiet, but my personality really comes out in 1 on 1 conversations.

- When it comes to group settings I need time to warm up, before I start adding to the conversation.
